I know we are working on this response as a part of our Q&A, but I'm not sure we would have anything we can give her right now. I am happy to provide her with our statement and let her know that we will get more info as we receive it.

Subject: Interview request from CSMonitor RE: environmental impacts of WV chemical spill

Dear Ms. Smith,

I am a reporter for the Christian Science Monitor working on a story on the potential environmental impacts of the West Virginia chemical spill. I would like to speak with someone from the EPA about the potential impacts of the spill on the Elk River

ecosystem and the surrounding environment.

My deadline is the end of day today so I hope to connect with someone as early as possible this afternoon.

Regards,

Noelle Swan
